

HELP

1. The Add button:

Select one category, enter dish name, enter price, select spiciness and then add it to the table. Each field if required and the price should be valid number. You cannot add if the table is already full.

2. The Clear button:

This button will clear your current input selection before adding to the table.

3. The Delete button:

This button will delete a selected row. One row **MUST** be selected in order to delete the row.

4. The Search button:

This button will search for the dishes with matching price if found; the price is entered just above the button. The price in the text field should be a valid number in order to make the search.

5. The Find Dish button:

This button is used to search the dishes by category. You will need to select one category from the available 5, next to this button. When clicked, this button will show the number of dishes available along with its dish name for the particularity selected category.
